

It is not always reasonable to transfer films by yourself – you may not have the time or the amount of film material does not justify the purchase of one's own equipment. If you are looking for a film conversion expert near you then just have a look at the list under "Service". You will find several companies, which will transfer your films.

We are often asked about the difference between various transfer methods. We have created a demo-DVD that presents the various different methods for this reason.

Test films are shown that were transferred using equipment from Rank Cintel, MWA, MPS, Brähler, Berola and Telecine. Unknown systems are also included on this DVD.

Order number: 4300, price 3.00 EUR, including shipping in Germany 5.00 EUR.

Please use the "Order" page.

Our services:

Until now, video transfer or Telecine has been a time-consuming and complex matter for film amateurs.

You can convert your film projector (or we can do this for you) and by using our synchronic-direct capturing, sync-dc, method and the according components you can transfer your films to DV-Band or your computer in new and improved quality. This process is even gentle to your film with LUMILED Cold-Light Illumination.

Thus, the prerequisite for the finishing of your film rarities on your computer is fulfilled and your films can be archived in the long-term.

Our video capturing "sync-dc" works according to the SCAN-Process with 16,66 or 25 pictures/second in cases of PAL-Recording or 20 pictures/second with NTSC.

About Us:

Our own personal needs were the beginning of everything.

As a result of many requests, we started a small development series and now offer these components here. We are and we will remain a small company that is only devoted to the previously mentioned technology. All of our parts and devices are made in Germany.

We also build custom-made products upon request.

How to order and how we deliver:

Please order via the following "Contacts" or online. We deliver with payment in advance in order to avoid the high costs of C.O.D parcels. You will receive an e-mail including the invoice and bank information after ordering. Delivery is made immediately upon receipt of payment.

Of course, you can return goods within 14 days.

We would be more than happy to answer all of your questions.

In cases of technical questions we would like to consult the appropriate equipment manual before answering your question. It is more effective to direct questions concerning cameras and software to the appropriate supplier or manufacturer.

Please read our "Frequently Asked Questions".

We are available for questions Monday to Friday from 9:00 a.m. to 6:00 p.m.
